

Woven Bags

ToolAsian

PP/HD Woven Bags

We produce these bags in large quantities allowing for very competitive pricing. Woven polyethylene or polypropylene bags designed to ship divided large quantities of dry product in a cost-effective manner. Woven PP bags are the most common bags in the packing industry due to their wide variety of usage, flexibility and strength.

These are commonly used in packing fertilizers, feeds, grains, flours, salt, sugar, cement, seeds or any other palletized and powdered materials. Woven PP bags are also used in the construction, chemical, plastic resins, agricultural, mining and building materials industries. You can get standard bags or order tailor-made bags for special applications.

You have a broad range of sizes and colors to choose from and, of course, custom printed bags featuring your logo or text is also an option.

Paper Laminated Woven Bags

We have State of The Art Technology to manufacture such bags. We offer Center Sealed (back seam)and 'L' type stitched bags. These bags are used to protect packed products from moisture. Cement, Milk Powder, PVC resins, Polymer compounds, Agro products, Guar Gum, Animal feeds, Pharma and Chemical products are being packed in such bags. Our Poly paper woven bags are useful for packaging different types of products such as pet food, fertilizer and yard waste. These bags are having Three layers or more. In three layers, Inside one is of woven fabric, which gives strength.

Middle one is PE film, which works as barrier to water and Top layer is of Kraft Paper, which works as barrier to moisture. So content kept in such bags are safe. We make such bags in brown Kraft and white kraft paper and also with and without Poly liners and Printing.

BOPP Printed Bags

BOPP (Bi-axially Oriented Polypropylene) bags come in either a circular woven design with a one side or two sided (sandwich) outer ply lamination, or the more popular back seam style which offers consistent sizing for improved performance on automated packaging equipment.

BOPP laminated woven polypropylene bags offer the same strength advantages but with the highest photographic print quality and protection available. Your graphics, up to 10 color flexo or rotogravure, are sealed beneath the film and protected from handling and weather, keeping your consumer package looking fresh on the shelf with a sharp, eye appealing appearance.

Small Handle Bags

These bags are made out of PP woven, Kraft Paper, Non woven and BOPP woven fabrics. They are available with or without printing and in different sizes and with handles for packing of all powder and granulated materials like food grains etc. We make such bags as per the customers requirements.
